PORTFOLIO

ABOUT ME

I am a junior mobile developer proficient in java programming language for native android, flutter and other tech stacks as listed. I like to challenge myself to learn new things and always on the look out to work on exciting projects. I am now focusing in building beautiful and responsive applications for seamless user experience; writing clean, maintainable, and efficient code using current best practices in mobile development. Able to build an app from the ground up – from concept, navigation, layout and programming to deployment, optimization and maintenance.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology
Bachelor BIT

PROJECTS

2022, April **Finder**

- Real estate app for rental spaces

Used: Flutter, Firebase, Stream API

2022, Jan **Interior AR**

- Augmented Reality interior design. [Appstore](#)

Used: Java, Sceneform

2021, June **Developer Mentorship program**

- Selected as a Mentor in the Google Africa Developer Program to mentor mobile developers.

2021, March **Matibabu Health**

- Android app that allows patients to work much more closely with their clinical providers. [Amazon app store](#).

Used: Java , Firebase

2020, Oct **Google Africa Developer Scholarship community project**

- Worked with a team on a mobile app to connect freelancers to potential employers and clients. I was responsible for integrating the chat API utilizing firebase for the backend.

Used: Java, Firebase

2020 Sept **GADS leaderboard 2020**

- Mobile app that displays the Google Africa Developer Scholarship's top learners based on learning hours and skill IQ, utilizing REST architecture.

Used: Java

2020, May **Cohort 1 of the Facebook Developer Circles Build for SDG 2020 challenge**

- At this technical product challenge, we presented a web app to help connect sick/injured people to available health specialist. I worked on the backend of the web app utilizing the Django framework for user authentication and data storage.

Used: Python Django, JavaScript, HTML, CSS

TECHNICAL SKILLS

Tools:

- Programming Technologies: Flutter, Java, Android framework.
- Other tech stacks I've used: firebase, Python, SQLite, Django framework, git vcs,, JavaScript, HTML,CSS...
